## Incubation-Centre

We aim to create a holistic environment to help innovation-driven individuals to layout and succeed in their business ventures under coordinated direction. The incubated start-ups are not only an advantage because of the business resources and technical assistance, but they also benefit from a supportive and conductive community with vibrant academia who lead and inspire them to build a sustainable business model that stands out in the competitive environment.

The selection criteria for inducting start-ups as incubates include:

Novelty of the idea

Compelling solution

Scalability potential

Well rounded team
